

# CONFIDENTIAL: Case Study Rapid Finance 18

PROJECT CASE STUDY: Rapid Finance

-----

Client Industry: Enterprise Level

Location: London

Challenge:

The client faced significant scalability issues with their legacy infrastructure.

Data processing was taking 48+ hours, leading to business delays.

Solution Delivered by NexusTech:

We implemented a microservices architecture using AWS Lambda.

The system was deployed across three availability zones for maximum redundancy.

Key Results:

- Automated 90% of workflow
- Integrated fully with existing legacy systems within 3 months.
- Security audit passed with 0 critical vulnerabilities.
